KRMCA Mourns Passing of C.P. Jones of Maysville Ready Mix

Coleman P. (CP) Jones, Jr. passed away Sunday, April 17, 2016. He was born July 26, 1929, and was a veteran of the Korean War where he was stationed in Germany. While there, he graduated from the NCO Academy. After his service, he returned to Maysville taking a position at Wald Manufacturing. In 1955, he began his career at Maysville Ready-Mix Concrete. He eventually co-owned the company with Bob Verville, but in 1999 they sold the company to Hilltop Basic Resources. He was a member of the Maysville Church of Christ, past president of the Maysville Rotary Club and Aberdeen Lions Club, and he served for over 20 years on the Aberdeen Village Council.

Thoughts and prayers are with the Jones Family and the employees of Hilltop Basic Resources.

Memorials can be made to Hospice of Hope.

RMC Research & Education Foundation Launches Major Matching Gift Campaign

San Diego, CA - April 11, 2016: The Ready Mixed Concrete (RMC) Research & Education Foundation launched a major fundraising campaign and celebrated its 25th anniversary with an event on Sunday, April 10 in conjunction with the National Ready Mixed Concrete Association's 2016 Annual Convention in San Diego. The fundraising campaign is to secure matching gifts to leverage a \$3 million pledge recently made to its organization by the Troesh Family Foundation. The Troesh gift, to be paid over five years, is predicated on the RMC Research & Education Foundation achieving a 3:1 match in contributions from industry and other sources. A total of \$9 million in new contributions must be pledged in order to receive the full \$3 million gift from the Troesh Family Foundation. The overall goal would be to raise \$12 million over five years to achieve a fully-funded endowment at RMC's current funding levels.

At the event, RMC Research & Education Foundation leaders announced that they already have secured \$3,275,000 in new pledges toward the match during a quiet phase in March. These pledges have been made by the following companies: at the \$500,000 level: Ash Grove Cement, CalPortland, and Lehigh Hanson; at the \$300,000 level: GCP Applied Technologies; at the \$275,000 level: Vulcan Materials Company; at the \$250,000 level: BASF Corp., Command Alkon, Concrete Supply Co., and U.S. Concrete; and at the \$100,000 level: Chandler Concrete and Staker Parson Companies - An Oldcastle Company.

"It's exciting that so many companies have been willing to immediately step up to the challenge, even before the official launch of our campaign," said Chairman of the RMC Research & Education Foundation, Matt Wood of Ash Grove Cement Company. He continued, "It is a testament to the Foundation's high-value research and education programs that companies like ours are so willing to reinvest in this important industry resource."

Julie Garbini, RMC Research & Education Foundation Executive Director, added, "These early commitments have gotten us off to a great start, and we are humbled that so many companies have been willing to step up early on. Achieving the \$9 million match to fully leverage the Troesh Family Foundation gift will not be easy, but we believe it can be accomplished. If we are able to achieve our goal, we anticipate that the Foundation will finally be fully-funded so that it can be maintained as a lasting industry resource for funding research and education."

For more information on the RMC Research & Education Foundation and its programs, please visit www.rmc-foundation.org.

We are excited to announce that on May 1, 2016 the Portland Cement Association, Southeast Region, will transition to the **SOUTHEAST CEMENT PROMOTION ASSOCIATION, INC.** From this point forward, we will be operating as an affiliate of the Portland Cement Association. The Southeast Cement Promotion Association, Inc. represents the manufacturers and distributors of Portland and masonry cement in the states of Alabama, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Maryland, Virginia/DC, and West Virginia.

KRMCA Annual Golf Outing Fast Approaching

On page 17 of this newsletter is the registration form for the 30th Annual KRMCA Golf Outing. This year's outing will be held at the Frankfort Country Club in Frankfort, KY on June 20th, 2016. This day begins with lunch at 11 am followed by the golf scramble at noon. After completing the 18 holes of golf, there will be dinner and the golf awards handed out. Also, each player will receive the logo golf shirt, and refreshments on the course. Please get your teams together as soon as possible and get your registration form in to the KRMCA Office.

Like the last couple of years, the team mulligans will once again support the KY Concrete Industry PAC. The "Back the PAC" Mulligans will be sold for \$100 per team, or \$25 a player (note- 1 on each side, 2 per player). Please remember to bring a personal check to the outing with you. Also, you will be asked to fill out the KCI PAC form that day- the form is available on page 8 should you decide to fill it out and bring it with you that day.

A special thanks to the KRMCA Gold Club for their support by being the KRMCA Golf Outing Hole Sponsors. If you, or your company, would like to be a member of the Gold Club, or be a Golf Hole Sponsor, there's still plenty of time to get your information in. Please see page 16 for the Gold Club form.

If you have any questions regarding the 30th Annual KRMCA Golf Outing, please contact the KRMCA Office.

2016 KRMCA President, Chad Deters, and his team at the 2015 KRMCA Golf Outing

*Discounted rates will be available for all KRMCA members. Companies who have been a member and are rejoining the KRMCA will have to pay the dues for the prior two years to be eligible for the school discounted rate. Companies who are joining KRMCA for the first time will be eligible for the discounted rate immediately.

KRMCA members have the first opportunity for registration. Please register early. We will send out information, to all those registered, regarding directions at a later date.

**Classes are payable in advance or on day of class. Refunds will be given if at least a 24-hour notice has been received. Payment must be received prior to taking the class for non-KRMCA members.

Congratulations Emalee Haynes, NRMCA National High School Essay Winner

This year, the NRMCA National High School Essay Contest Winner is Emalee Haynes of Central Hardin High School. Her essay described how concrete played a major role throughout her father's military deployments. It was revealed to Emalee that concrete provided shelter and safety for her father and the soldiers that served with him and that concrete was also used to rebuild clinics and schools in devastated communities in the Middle East. Emalee learned that concrete is durable, sustainable and its protective attributes contributed to helping the U.S. Army fight the war against terror. Ms. Haynes received a college scholarship check in the amount of \$2,000.

Emalee was the KRMCA William T. Robertson High School Essay Contest Winner. She was flown with her family to San Diego to accept her award at the NRMCA Annual Convention. Congratulations Emalee!

Passive building construction techniques utilized in construction of new Oldham County EMS Station

Building design highlights energy efficiency and sustainability

Since 1970, April has been designated as Earth Month, a movement to bring awareness and build action toward environmental issues with the goal of building a sustainable future. Last fall, when the Oldham County Ambulance Taxing District broke ground on a new EMS station on land leased from Baptist Health La Grange, the decision to integrate “green” concepts throughout construction was both a move to improve efficiency and to be environmentally responsible.

Passive building construction is really a conscious decision to incorporate energy efficiency throughout a structure,” said building architect Jill Lewis Smith, of Civic Consultants. “The structure is designed to be sustainable, disaster resilient and energy efficient. Once complete, it should use less than 50 percent of energy prescribed in the current Kentucky Energy code.”

The building design includes the following elements:

- A cast-in-place steel reinforced concrete wall structure with five inches of high performance insulation installed on both sides of the building. The 12 inch thick concrete walls combined with the insulation, will store energy and help to regulate temperature swings as well as provide structural integrity.
- The roof is structured from wood trusses with hurricane style straps and an energy efficient spray foam insulation. Solar panels on the building roof will augment the overall energy needs, and during half of the year may provide all the energy needed to operate the building.
- The latest LED lighting is six times more efficient than incandescent and three times more efficient than fluorescent lighting. Most of the lighting is set up on motion detection, conserving energy when areas are vacant.
- A special exhaust ventilation system will be installed in the ambulance bays so that large garage doors can remain closed while vehicles are running.

Continued on Page 11...

Passive Building Continued from Page 10...

-In addition, the structure includes a brick and concrete exterior with metal trim and several water management techniques to maintain water and protect the building from damage. The goal was to create a low maintenance building design.

The facility will become the new main headquarters for Baptist Health/Oldham County EMS. Currently headquartered in Buckner, the new station will be located on the Southwest side of Baptist Health La Grange campus.

When completed, the station will be approximately 10,800 sq. ft. with capacity for eight ambulances with four drive-thru bays and an area for cleaning and maintenance of all vehicles.

The station will also include a kitchen, lounge, office space, storage and training room. The \$2.25 million construction, by Roederer Construction Inc., is scheduled for completion in mid-2016.

New EMS facility in Oldham County utilized ICF construction.

Rate Increases Coming in July for ACI Level I Classes

Beginning with the July 26th ACI Level I Class, there will be an increase in the cost for the certification. At the Winter Board Meeting, the Board voted to increase the fees for the class to make up for increase in expenses for the class over the last five-seven years. As you will notice in this newsletter, there are two ACI Level I registration forms– one for the May and June classes, and one for the July, August and September classes. This is to reflect the changes in the fees. The May ACI Level I class is currently filled, with some availability still in the June class– seats will be filled on a first come, first serve basis, with KRMCA members receiving priority. The new registration form has “New class rates effective July 1, 2016” in the top left corner of the form.

Another change that will be occurring come July is additional fees that can be accrued during the ACI Level I class. Beginning with the July class, if you cancel within a week of the class, there will be a \$100 charge, plus any cancellations will be charged the cost of the ACI Manual (or it can be returned). If you cancel over a week out, there won't be a cancellation fee, just the charge for the manual, unless it is returned. Another change is that if you change classes from one month to the next– you will be permitted one move, but if you move again, there will be a \$100 charge, and each time after that, there will be additional \$100 charges.

Please make sure you can attend the class for which you register. Should you have any questions, please contact the KRMCA Office.

~~~~~

## KRMCA 2016 Membership Directory

By now, KRMCA members should have received their directory listing form and directory ad form in the mail. Please make sure that you make any changes necessary, provide a company point-of-contact email, and send it back to the KRMCA Office, even if there aren't any changes to your listing.

Included in the mailing was the Directory advertisement form. If you would like to advertise in the KRMCA Directory, please fill this form out and send it in to the KRMCA Office. There is plenty of time to make a decision of whether or not to advertise. Should you have any questions about advertising, please contact the KRMCA Office.

If you have any questions regarding company listings or advertising, please contact the KRMCA.

## **NRMCA Launches New Industry Campaign– Build with Strength**

At the recent NRMCA Board of Directors meeting in San Diego, NRMCA and the marketing firm DDS launched the new NRMCA coalition campaign entitled Build with Strength. The mission of the coalition is to “educate the building and design communities and policymakers on the benefits of ready mixed concrete, and encourage its use as the building material of choice for low– to mid-rise structures. No other material can replicate concrete’s advantages in terms of strength, durability, safety and ease of use.”

This coalition will use real-world examples of the strength, safety, flexibility and long-term ROI of concrete to showcase it as the BOLD and INNOVATIVE solution to the vast range of building needs. With this campaign are some simple recommendations you can do to further the mission of the coalition:

1. Understand Change– today, developers are using wood frame to build low– to mid-rise buildings
2. Be Entrepreneurial—promote concrete as THE material of choice for buildings
3. Use Industry Communication Messages—reinforce the branding and message of the coalition
4. Use Industry Resources—use the promotional, technical and human resources available through NRMCA and its partners
5. Assist Changing Local Building Codes– help NRMCA change local building codes that make buildings safer and more resilient
6. See Opportunities—be the eyes and ears of the industry. Identify developers (your customers) who might be open to concrete solutions for their building projects.

To begin, please visit the Build with Strength website– [www.BuildwithStrength.com](http://www.BuildwithStrength.com)— and view the videos on the site. Browse the site and learn more about the coalition. When utilizing social media, use the hashtag #buildwithstrength.

The KRMCA Promotion Committee will be discussing the coalition at its upcoming meeting on May 17th. If you have any questions, please contact the KRMCA Office.

# to attend \_\_\_\_\_ x \$335.00 = \_\_\_\_\_ Discount Rate

# to attend \_\_\_\_\_ x \$670.00 = \_\_\_\_\_ Regular Rate

RETESTING \_\_\_\_\_ x \$150.00 = \_\_\_\_\_ (took the test and failed, retesting)

*Please see below for additional fees that can be accrued.*

**Please return this form and check to:**

**Kentucky Ready Mixed Concrete Association**

**1 H.M.B. Circle, Frankfort, KY 40601**

**(502) 695-1535**

**FAX: (502) 695-9499**

**Email: [SHagg@krmca.org](mailto:SHagg@krmca.org)**

\*Discounted rates will be available for all KRMCA members. Companies who have been a member and are rejoining the KRMCA will have to pay the dues for the prior two years to be eligible for the school discounted rate. Companies who are joining KRMCA for the first time will be eligible for the discounted rate immediately.

\*\*Classes are payable in advance or on day of class. Payment must be received prior to taking the class for non-KRMCA members.

**\*\*\*Additional Fees:**

**Cancellation:** \$100.00 if it is within one week of the class; all cancellations will be charged for the price of the ACI manual

**Changing Classes:** Please make sure you can attend the class on the given day. Each attendee can move from one class to another once without a charge. If you move classes a second time, there will be a \$100 charge for the change and an additional \$100 for each change after that.

*KRMCA members have the first opportunity for registration. Please register early. We will send out information, to all those registered, regarding directions at a later date.*

## Maintenance...Maintenance...Maintenance

Pervious concrete has been gaining more and more popularity around the Commonwealth of Kentucky, and when speaking with individuals about the product, MAINTENANCE is always one of the first topics discussed. Like all stormwater best management practices, pervious concrete requires maintenance to keep the system in working order. If no maintenance is performed on pervious concrete, the system will fail and will require a complete rehabilitation, which can be quite expensive and intensive. The best maintenance is periodic maintenance of pervious concrete.

Recently, the KRMCA with Jack Wright, of Warren County Stormwater, and Western Kentucky University, hosted a Pervious Concrete Maintenance and Cleaning Program and Demonstration with Alan Sparkman, Executive Director of the Tennessee Concrete Association. Alan gave a presentation on the importance of proper maintenance of pervious concrete, followed by a live demo of the cleaning equipment on one of the pervious concrete parking lots on the campus of WKU.

John McChord, PE, KRMCA Director of Engineering, performed the ASTM C1701-09: Standard Test Method for Infiltration Rate of In-Place Pervious Concrete, to establish a baseline prior to any maintenance performed. After the benchmark was determined, the

TCA Executive Director, Alan Sparkman, demonstrating the cleaning of pervious concrete at WKU.

cleaning demonstration began. Following the cleaning, the test method was again performed and these rates were compared to the baseline.

Pervious Concrete systems need a solid maintenance program to insure that they will continue to perform for many years after installation. Each attendee received a copy of the NRMCA Pervious Concrete Pavement Maintenance and Operations Guide. Because of this success, the KRM-

---

CA will be working with Jack again to bring Alan and the program back to Kentucky in the fall for the quarterly Kentucky Stormwater Association Quarterly Meeting.

If you would like the KRMCA to meet with your city to discuss pervious concrete and a maintenance program, or if you would like copies of the maintenance guide, please contact the KRMCA Office.
